Windows Vista Capable* and Premium Ready* PCs from Dell

Dell makes it easy for you to select a system today that can run Windows Vista when it is available - so, there's no need to wait. By purchasing a Windows Vista Capable* or Premium Ready* PC today, you'll be able take advantage of the opportunities of Windows XP today and have the ability to upgrade to Windows Vista when it is available.

What is a Windows Vista Capable* PC?

Dell provides Windows Vista Capable* and Windows Vista Premium Ready* PCs across its product lines. Please refer to [this chart](#) for details on specific systems that are currently shipping.

- A modern processor (at least 800MHz).
- 512 MB of system memory.
- A graphics processor that is DirectX 9 capable.
- A DVD readable drive.

 - ▶ Online Support
 - ▶ Dell On Call Advanced Vista Support
- Recommended Systems**
- ▶ Medium & Large Business
 - ▶ Small Business
 - ▶ Home & Home Office

In addition to the above requirements, Dell further recommends the following for basic Windows Vista functionality:

- A hard drive with at least 15 GB of free space

Additional Recommendations

Note that Microsoft considers a Windows Vista Capable^{*} designation to mean that a system meets the minimum hardware requirements to provide the core functionality of Windows Vista, consistent with basic versions of Windows Vista.

A system with less than 1 GB of system memory will not support many of the advanced features of premium versions of Windows Vista, including the Windows Aero™ user interface. To make sure you get the most out of Windows Vista, use the following guidelines:

- To access Aero and other premium benefits, Microsoft recommends a system designated as Premium Ready^{*} (further defined below).
- For an improved experience, Dell also recommends configuring your Premium Ready^{*} system with 1 GB dual-channel (2-DIMMS) RAM^{*} and a premium 128 MB graphics card from ATI or nVidia, which can further enhance the Windows Vista experience.
- To help further optimize your Windows Vista experience, Dell recommends 2 GB dual-channel (2-DIMMS) RAM^{*} and a premium 256 MB graphics card from ATI or nVidia.

What is a Windows Vista Premium Ready^{*} PCs?

Take Windows Vista to the next level - look for Premium Ready^{*} PCs. These special PCs can enable premium experiences in Windows Vista like the Windows Aero™ user interface. Windows Aero is designed to provide:

A Windows Vista Premium Ready^{*} PC includes at least:

- 1 GHz 32-bit (x86) or 64-bit (x64) processor.
- 1 GB of system memory^{*} (note: Dell recommends dual channel memory)
- Support for DirectX 9 graphics with a WDDM driver, 128 MB of graphics memory (minimum)^{*}, Pixel Shader 2.0 and 32 bits per pixel.
- 40 GB of hard drive capacity with 15 GB free space.
- DVD-ROM Drive^{*}.
- Audio output capability.
- Internet access capability.

Note that to provide the advanced features of Windows Vista including the Aero user interface, Premium Ready^{*} systems must also be running one of the premium versions of Windows Vista, including: Windows Vista Home Premium, Windows Vista Business, or Windows Vista Ultimate.

- For an improved experience of Aero and other key features, Dell also recommends

configuring your Premium Ready[®] system with 1 GB dual-channel (2-DIMMS) RAM^{*} and a premium 128 MB graphics card from ATI or nVidia.

- To help further optimize Windows Vista experience, Dell recommends 2 GB dual-channel (2-DIMMS) RAM^{*} and a premium 256 MB graphics card from ATI or nVidia.

NOTE: Not all Windows Vista[™] features are available for use on all Windows Vista Capable[®] PCs. All Windows Vista Capable PCs will run the core experiences of Windows Vista, such as innovations in organizing and finding information, security, and reliability. Some advanced features -- like the new Windows[®] Aero[™] user interface -- are available only in premium editions of Windows Vista and require advanced or additional hardware.
